... Go to the link above for more info or to purchase. The new flight simulator Cabin Crew is now available in the Steam Store. Thank you for your support. Simacore Team P.S. FS Cabin Crew is not the "official" release of FS Elite Dangerous; we are merely an independent release. If you are interested in FS Elite Dangerous, you should go and purchase a license from Frontier themselves. Cabin Crew has been released, you can read more about it on our blog here: Thank you to all of the simmers who have reported issues; they have helped us to resolve the majority of the problems. ** If you see a message like this, it means you have a problem with your FSshuddy account; click on the link at the bottom of the message and it will take you to the correct forum. **Efficient laser action in a Cd-Pd alloy and its relation to strain and defects. The alloy of Cd_{0.5}Pd with a solid solution of Cd-Pd, i.e., the beta phase, is a semi-conducting material with a low melting point and high thermal expansion. The in-situ annealed beta CdPd is expected to show strong laser action due to its high nonlinear optical constant and high value of the thermodynamic figure of merit ZT, which is the ratio of the thermoelectric power factor to the temperature-dependent thermal conductivity. Here we demonstrate the laser action in an as-cast beta CdPd by laser-induced optical breakdown, and the laser action is related to the defect structure of the alloy. It is known to provide a radio controlled window wiper system for controlling the operation of window wipers of a vehicle. Such systems are disclosed in a number of prior patents such as U.S. Pat. Nos. 4,349,100, 5,099,854, and 5,062,791. Such radio controlled systems utilize a receiver, such as an inductively coupled coil in the vehicle door and a remote control transmitter held by the vehicle 82157476af
